Jl. Pangheotan no. 14 a, RT. 002 RW. 009 Ds. Sadangmekar Kec. Cisarua

I am a sixth-semester student majoring in Informatics Engineering at Pasundan University. I possess skills in UI/UX design, web development, graphic design, and IoT engineering. My experience includes 2 years of web development during vocational high school, 2 years focused on UI/UX since starting college, and 4 years in graphic design. Additionally, I am currently participating in the MSIB Kampus Merdeka Batch 6 program for IoT Engineering. I am capable of working under pressure and quickly learning new things.

Work Experiences

Universitas Pendidikan Indonesia - **Bandung, Indonesia**   Jan 2020 - Mar 2020
Game desaigner, Programmer
A project to develop an educational game for elementary school children. The objective was to create an engaging educational experience targeting elementary school-aged kids. I contributed to various aspects of the project, including game development and design.

Education Level

PT. Ozami Inti Sinergi (Indobot Academy – IoT Engineer) - **Yogyakarta, Indonesia**   Feb 2024 - Present
MSIB Study Independent Batch 6
Final project of the MSIB program, I served as an IoT Engineer, taking on roles as both a web developer and firmware engineer. My responsibilities included developing a flood mitigation monitoring project integrated with IoT devices connected to Firebase. This involved firmware development for IoT devices and creating a website for real-time flood monitoring.
